FIRST CLASS MEETS MOTHER NATURE

When standard simply won’t suffice, the 2019 Pace Arrow LXE is ready to take your adventures to another level. Pace Arrow LXE is a luxury-packed Class A Diesel featuring an automotive style dash, elegant cabinetry doors and drawers, a two-burner induction cooktop, a Hide-A-Loft™ drop-down queen bed, residential refrigerator and a Blu-ray® entertainment center, to start. Pick from one of four impressive floorplans, each with modern interiors, then enjoy the finer life with soft-touch ceilings and hand-laid composite tile flooring.
YOU WANT EVERY SINGLE ADVANTAGE WHEN IT COMES TO YOUR RV.

At REV, we don’t settle for anything less than the best, and neither should you. That’s why every Fleetwood RV motorhome features industry-leading materials and construction. With these REV trends, you’ll also find the ultimate in RV convenience and strength. Like our auto hydraulic leveling system, VacuBond™ construction, Dryseal™ edge coating, and much more — all coming standard to elevate your travels.

Each of these advantages have been engineered to deliver superior reliability, durability, and most of all, customer satisfaction.

1. Power Bridge™ Interior Atrium

Our Power Bridge™ interior atrium is designed and constructed with superior welding to add strength and improve corner stability and torsional integrity. With its modernist architectural style, the Power Bridge creates a true side-to-side, front-to-rear line of sight path through the motorhome to provide a spacious and open interior. With an interior height of 7’ 11” and a spacious living area, it’s the perfect pairing with the FrontPorch 5308, our signature motorhome.

2. Auto Hydraulic Leveling System

Multi-action shock absorbers, hanging jacks, and automatic hydraulic leveling system stabilize and ease your way in. The operating procedure is clean and easy, the mess up on one side, simply tip at the heel of your foot.

3. Powerlock™ System

(Precision-Welded Floors, Walls, and Roof)

REV’s Powerlock™ system provides a true one-piece welded-aluminum sidewall frame, bead-foam panel insulation, and Tuff-Coat fiberglass skin for durability and long-lasting strength. Our Vacu-Bond™ walls feature an adhesive bonding process that applies up to 415,000-pounds of vacuum pressure to our already strong welded-aluminum sidewall frame, bead-foam panel insulation, and Tuff-Coat fiberglass skin for more than 30 minutes — far exceeding industry standards.

4. Powerframe System™

(Precision-Welded Aluminum Walls, Floors, and Roof Structures)

REV provides a precise engineered weld on every joint throughout the REV motorhome. Every joint found in the frame of your Fleetwood motorhome has been welded by a certified welder to add strength to the frame, ensuring that your RV provides you with years of trouble-free operation.

5. Vacu-Bond™ Construction

Five Layer Wall

REV’s interlocking aluminum extrusion wall-joint system integrates floor, sidewall, and roof assembly into one locked-together overall structure for long-term support and is much more conducive to the demands of the road.

6. Solid Bead-Foam Engineered Fit Insulation™

The solid bead foam is precisely tailored to your REV Class A Diesel floorplan. This single-sided foam, made with a unique material that helps to seal out moisture, prevent delamination, and reduce sound. It’s a complete system of flexible, yet durable, Oetiker tubing, fittings, and stainless steel clamps that provide a watertight seal and eliminate the need for exposed seals and hinges. This system is reliable, durable and easy to use. The operating procedure is clean and easy, the mess up on one side, simply tip at the heel of your foot.

7. Dryseal™ Edge Coating

Outer wall materials are treated to repel water and resist the elements. This outer solid bead foam panel insulation is designed to outlast your travels and provide superior reliability, durability, and most of all, customer satisfaction.

8. Tuff-Coat Engineered Vinyl Roofs

Our Tuff-Coat fiberglass skin on our Class A diesel products is more durable, look better, and get the job done! Our Tuff-Coat fiberglass skin is extremely weather resistant and UV resistant. Most importantly, there is no maintenance or upkeep to our Tuff-Coat fiberglass skin. It’s a true “Tuff-Ply” or Thermoplastic Poly Olefin, which is a proprietary material that is easy to maintain. Tuff-Ply is a non-streaking, non-chalking engineered vinyl material that is easy to maintain.

9. Tuff-Ply Engineered Vinyl Roofs

As the name implies, this “Tuff-Ply” or Thermoplastic Poly Olefin is a South Carolina engineered vinyl material that provides quality, protection and durability to the exterior finish with proprietary UV resistant formula that is bonded to the roof. Our Tuff-Ply fiberglass skin is made up of 60% acrylic, 30% polyester, and 10% polyurethane, which helps to withstand the rigors of the road and withstands the demands of the road.

10. Tuff-PEX™ Plumbing System

It’s a complete system of flexible, durable, Oetiker tubing, fittings, and stainless steel clamps that provide a watertight seal and eliminate the need for exposed seals and hinges. This system is reliable, durable and easy to use. The operating procedure is clean and easy, the mess up on one side, simply tip at the heel of your foot.

11. Tapered Slideout Box Tops

Our slideouts include a tapered design that gently slopes away from the RV to provide additional clearance during the motorhome. The Class A Diesel products feature the popular “tapered design” that gently slopes away from the RV to provide additional clearance during the motorhome.

12. Seamless Metallic Side Room Underbody

Our chassis underbody provides a sleek, seamless metallic finish to the elements. This is a vast improvement over standard “flat” underbody finishes that can be exposed to the weather. Our REV Class A Diesel products feature a seamless metallic finish that provides a sleek, seamless metallic finish to the frame and underbody.

13. Roto-Cast Molded Luggage Bays

Molded bays are far more durable than their wood counterparts. Not here! Our aluminum ramps will stay straight, extend and retract easily, and will provide years of trouble-free execution. Instead of cut-out foam channels, REV provides insulated A/C ducting that runs the length of all four sides and are located on the top of the bay to provide an additional level of moisture protection. There are also multiple bead-foam panel insulation and interlocking extrusions on the steel-reinforced bridge structure. No “hammer-down” is required.

14. Dedicated Full-Length Metallic A/C Ducting

Designed for each Class A Diesel floorplan. This is a vast improvement over standard “flat” underbody finishes that can be exposed to the weather. Our REV Class A Diesel products feature a seamless metallic finish that provides a sleek, seamless metallic finish to the frame and underbody.

15. Automotive Inspired Bonded Windshield

REV RV’s bonded windshields surpass the standard “floating” windshield in appearance, support and is much more conducive to the demands of the road. These bonded windshields are more secure, add strength, and provide years of trouble-free execution.

16. Roto-Cast Molded Luggage Bays

Instead of the industry-standard plywood, these molded bays are more durable, look better, and get the job done! Our Tuff-Ply fiberglass skin is made up of 60% acrylic, 30% polyester, and 10% polyurethane, which helps to withstand the rigors of the road and withstands the demands of the road.

17. Bus-Style Cargo Doors

We far exceed the industry standards of exposed seals and hinges with a more secure welded design that helps to keep your RV secure from outside elements.

18. Premium Full-Body Paint

With its modern-engineers all-steel structure, the Power Bridge creates a true side-to-side, front-to-rear line of sight path through the motorhome to provide a spacious and open interior. With an interior height of 7’ 11” and a spacious living area, it’s the perfect pairing with the FrontPorch 5308, our signature motorhome.

19. Bus-Style Cargo Doors

The industry standard square corner door allows for too much wind noise. So, instead of cut-out foam channels, REV provides insulated A/C ducting that runs the length of all four sides and are located on the top of the bay to provide an additional level of moisture protection. There are also multiple bead-foam panel insulation and interlocking extrusions on the steel-reinforced bridge structure. No “hammer-down” is required.

A REV RV exclusive, our Hide-A-Loft™ Bed System offers a capacity of up to 500 lbs. The bed includes a queen mattress and is incredibly comfortable for long-lasting durability. It helps to seal out moisture, prevent delamination, and will provide you with years of trouble-free operation.

21. Dealer Partnership

This water-wicking coating is applied to every edge of the walls and windows as it comes and is very low maintenance. Tuff-Ply is flexible, pliable and easily cut. As the name implies, this “Tuff-Ply” or Thermoplastic Poly Olefin is as tough as it gets. Our Tuff-Ply fiberglass skin on our Class A diesel products is more durable, look better, and get the job done! Our Tuff-Ply fiberglass skin is made up of 60% acrylic, 30% polyester, and 10% polyurethane, which helps to withstand the rigors of the road and withstands the demands of the road.

For the industry’s largest selection of RVs, visit a dealer near you today. REV’s Slideout Box Tops are made from a unique material that helps to seal out moisture, prevent delamination, and reduce sound. It’s a complete system of flexible, yet durable, Oetiker tubing, fittings, and stainless steel clamps that provide a watertight seal and eliminate the need for exposed seals and hinges. This system is reliable, durable and easy to use. The operating procedure is clean and easy, the mess up on one side, simply tip at the heel of your foot.
True luxury and comfort is having it all — and the Pace Arrow LXE delivers just that by meeting all your lifestyle requirements. Whether a weekend away, a summer at the campsite or months on the road at a time, Pace Arrow LXE will meet those expectations, and then raise the bar even higher.
Pace Arrow LXE lets you live in residential-style living with luxury amenities and lots of space to move about. Spacious storage, full size residential refrigerator and multi-plex lighting controls.

Product information, photography and illustrations included in this publication serve as examples and are not to be used in the finished product. **CSA Standard** may require substitution or deletion to achieve conformance.
Fleetwood RV is part of REV Recreation Group, a division of REV Group, Inc., a family of 33 industry-leading motor vehicle brands. At REV Group, we innovate, design and build products that connect and protect thousands of people every day—our trusted vehicles are engineered with the utmost rigor and precision to deliver the highest levels of performance, reliability, durability and safety.

**DISCLAIMERS**

1. GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this fully loaded motor home. The GVWR is equal to or greater than the sum of the (UVW) unloaded vehicle weight plus the (OCCC) occupant cargo-carrying capacity.*
2. GAWR (Gross Axle Weight Rating) is the maximum permissible loaded weight a specific axle is designed to carry.
3. GCWR (Gross Combined Weight Rating) is the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed vehicle. Towing and braking capacities may be different. Refer to Fleetwood and chassis manufacturer’s manuals for complete information.
4. Length measured from front bumper to rear bumper (excludes accessories).
5. Excludes safety equipment and awnings.
6. Motor homes feature a body width over 96” which will restrict your access to certain roads. Before purchasing, you should research any state and/or province road laws which may affect your usage.
7. Tank manufacturer’s listed water capacity (WC). Actual propane capacity is 80% of water listing as required by the safety code.

† The chassis manufacturer recommends the installation of a supplemental brake control system to activate the brakes on the vehicle or trailer you are towing. Hitch receiver ratings expressed are maximum for the hitch receiver installed and may require the purchase of additional equipment that is dependent on the weight of the towed load. Consult with hitch receiver manufacturer for further information.

* UVW and OCCC are found on the label containing the federal certification tag in each RV.

** Seatbelts and locations are shown in the brochure for display purposes only. Actual numbers and locations will vary by model.

*** All 2019 REV Recreation Group motorhomes include a limited one year/15,000-mile coach warranty and three-year/45,000-mile structural warranty, whichever occurs first, and it is fully transferable for the first 12 months.

---

**FLEETWOOD MOTORHOME ASSOCIATION**

As a Fleetwood RV owner, you’re invited to become a member of the Fleetwood Motorhome Association (FMA). Becoming a member is the perfect way to meet other Fleetwood owners who love to travel across America and share in the RV lifestyle. Visit the FMA website at www.fma4fun.org to learn more and join the fun.
